

CHAMELEON

Striking flame columns and fire balls

Le Maitre®
PYROTECHNICS & SPECIAL EFFECTS

The Chameleon is the ideal solution for anyone wanting to create a propane-style flame without the headaches. Using a re-loadable canister system, the Chameleon performs just like a propane system but at a fraction of the cost. It can be set-up to strike in minutes and is tough enough for the most rigorous tours.

Flames can be fired in columns 8-10ft high or in quick succession fire balls. Fuel canisters are available in natural (butane/propane) and red or green (methanol/ethanol).

Visit our website for further information, photos and videos
