WIRELESS SALAMANDER QUAD PRO

*A completely
wireless stunning,
high flame effect*

The new Wireless Salamander Quad Pro is a completely wireless version of the highly popular Salamander Quad Pro. It is battery powered, with integrated wireless COBRA firing systems technology. With an internal chargeable battery and no running cables, the Wireless Salamander Quad Pro can simply be put in place and switched on making it easy, quick and safe to use.

The canister-based flame effect produces single continuous flames or flame bursts reaching up to 25ft in height when all four canisters are fired simultaneously, or up to 12ft if fired individually.

Chases are lightning fast and visually stunning, with fluid available in natural, red and green.

The Wireless Salamander Quad Pro is extremely safe. There are no internal valves or accumulators so gas never remains in the system once the canister has been removed and there is a tilt safety switch.
