RESCUE 300

Le Maitre's high powered smoke generator specifically for the Emergency Services

The RESCUE 300 is Le Maitre's high powered smoke generator specifically for the Emergency Services.

It retains all the features of Le Maitre's flagship smoke generator, the G300, whilst simplifying all operational controls and further increasing reliability. With a simple on/off control, smoke output control, an optional remote control and simple LED status indicators, the RESCUE 300 is designed to perform in the most demanding of applications. It provides a realistic reduced visibility environment, producing huge amounts of dense, white, non-toxic smoke, making it the ideal choice for use in breathing apparatus and fire safety training.
