

FREEZEFOG PRO

Dramatic, low-lying fog effect

The Freezefog Pro creates a dramatic, controllable low-lying fog effect when used in conjunction with a G300, GForce 2 or GForce 3 fog machine.

Le Maitre's specially formulated, water-based Molecular Low Fog Fluid is pumped from the fog machine into the Freezefog where it combines with either high or low pressure liquid CO2 from a remote cylinder. The effect is long lasting and residue free, remaining low lying and very cold.

Le Maitre's Freezefog Pro is the original Low Smoke Generator or LSG, and is the system of choice on theatre stages, film sets, clubs, tours and theme parks around the globe.
