

# SMOKE, HAZE & SPECIAL EFFECTS FLUIDS

**Le Maitre**  
PYROTECHNICS & SPECIAL EFFECTS

From steam simulations to low-lying fog to lingering haze, Le Maitre's fluids fit a wide variety of applications. Across the globe, theatres, production companies, arenas, theme parks, cruise ships, event organisers, the military and emergency services rely on Le Maitre for high performing, realistic, reliable and safe smoke and haze effects.

## SMOKE FLUIDS

### GLOBAL DELUXE SMOKE FLUID

Delivers a premium effect which can be used in all our smoke machines. Produces a thick, white, practically odourless smoke with a medium hang time. Available in 5L and 200L and 400ml canisters.

### LOW SMOKE FLUID

Used in a smoke machine in conjunction with the Freezefog Pro. It acts in the same way as dry ice fog but without the wet residue, creating a thick odourless cloud of fog with a short hang time. It is non-irritating, non-toxic, and non-flammable. Available in 5L & 200L.

### INDUSTRIAL SMOKE FLUID

Specially formulated for use by the Emergency Services for breathing apparatus and fire safety training. Available in 5L and 200L.

### QUICK DISSIPATING SMOKE FLUID

Dissipates smoke quickly and is ideal for situations where there could be a problem with smoke rising too quickly. It is also ideal to produce steam effects and nitrogen bursts. Available in 5L and 200L.

### EZ KLEAN MAINTENANCE FLUID

Preventative maintenance fluid for Le Maitre smoke machines. Use on a regular basis to reduce blockages and ensure a longer life for heat exchangers. Not for use in haze machines. Available in 5L.

### SMOKE FLUID CANISTERS

Smoke fluid canisters are pressurised cans of Global Deluxe smoke fluid which plug directly into the Minimist or Microfog smoke machines. Available in 400ml canisters.

## HAZE FLUIDS

### PUREHAZE FLUID

Specially formulated sugar-based solution produces very dry and very long lasting haze. Designed to hang in the air and accentuate beams of light, it results in some of the best haze for lighting enhancement. Available in 2.5L, 5L and 200L.

### C-BEAM HAZE FLUID

Exclusively formulated for use in the G300 when operating in 'haze' mode. Produces dry, long lasting haze capable of covering large areas very quickly. Ash content is very high. Available in 5L and 200L.

## SPECIAL EFFECTS FLUIDS

### SUPER BUBBLE FLUID

Ready diluted for ease of use, can be used with most generic bubble machines to create dryer, longer lasting bubbles and minimise the residue problems associated with other fluids. Creates the most transparent, vivid bubbles which are also odourless and non-flammable. Available in 5L and 200L.

### ARCTIC SNOW FLUID

Ready diluted for ease of use, the fluid is used with the Arctic Snow machine to create an amazing realistic snow effect with no residue. Safe and non-toxic, it produces a white, fluffy and light snow effect. Available in 5L and 200L.
