

# FREEZEJET

40ft jets of  
freezing  
fog

*Le Maitre's FreezeJet is a CO2 jet capable of generating a blast of freezing fog in columns of 30 to 40ft that disappear instantly when switched off.*

*The CO2 jet can be set to fire at different angles by adjustment of the nozzle.*

*A 25ft hose is fitted as standard and the unique design allows the unit to be used with high pressure LCO2, CO2 dewars or LN2 dewar tanks (with optional LN2 fitting).*

*Aluminium stainless steel construction makes the FreezeJet lightweight and easily portable yet robust. The anodized black powder coating ensures good stage camouflage.*

*The FreezeJet can be used to great effect in clubs, theaters, tours and theme parks.*

*Visit our website for further information, photos and videos*
